DETAILED ACTION

Response to Amendment

Applicant's arguments/amendments with respect to amended claims 1-7 and 9-30 filed November 8, 2005 have been fully considered but are not persuasive. The Examiner would like to point out that this action is made final (See MPEP 706.07a).

Applicant should submit an argument under the heading "Remarks" pointing out disagreements with the examiner's contentions. Applicant must also discuss the references applied against the claims, *explaining how the claims avoid the references or distinguish from them. The Examiner would like to point out that the Applicant simply contends that the reference does not show the entire claim without particularly pointing out the novelty, as per MPEP 714.04.* Furthermore, Applicant contends, "...Vos (prior art of record) neither teaches nor suggests initializing a path metric at a moment when the 8PSK data stream is changed into the QPSK data stream or BPSK data stream, or when the QPSK data stream is changed into the BPSK data stream, so that the path metric is not calculated based on a previously input data stream that includes errors..." The Examiner would like to point out that the modulation occurs at the transmitting end of a communication system. The claim referred to is directed to a decoding method. It is not clear how Applicant is able to change the modulation from the 8PSK data stream into the QPSK data stream or BPSK data stream or the QPSK data stream into the BPSK data stream.

Claim Rejections - 35 USC § 103

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-7 and 9-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Vos (USPN 5363413). See prior actions.

The Examiner disagrees with the Applicant and maintains rejections with respect to amended claims 1-7 and 9-30. All arguments have been considered. It is the Examiner's conclusion that amended claims 1-7 and 9-30, as presented, are not patentably distinct or non-obvious over the prior art of record.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
